Experience

Aether

Personal Project
2026

- Designed and built an interface integrating conversation, search, and schedule planning for clearer human-AI collaboration.
- Defined and polished the interaction structure, information hierarchy, layout direction, and iteration judgment while using Grok build and Cursor to accelerate the implementation.
- Delivered a responsive HTML prototype, with a complete case study explaining the design decisions.

optical-alignment. skill

Personal Project
2026

- Created an open-source agent skill for Cursor that automates the 'review-and-adjust' workflow, fixing recurring optical misalignment issues in UI development.
- Co-authored the skill documentation and workflow with AI; owned problem framing, change decisions, and browser-based visual verification.
- Published on GitHub for reuse in later interface polish.

Skills & Tools

UX/UI: Interaction structure, information architecture, layout and visual calibration, UI prototyping, case studies

AI collaboration: AI-assisted UI building, prompt writing, agent skill documentation

Tools: Figma, Cursor, Codex, Grok build, GitHub
